

1st World Congress on Industrial Process Tomography

CD Index

INTRODUCTION

Welcome, Co-Sponsors, Organising Committee and Advisory Group

Session A1: Applications

The Role of Electrical Resistance Tomography in the U.S. Nuclear Waste Site Characterization Program W.Daily and A. Ramirez	Page 2
Detecting Leaks from Waste Storage Ponds Using Electrical Tomographic Methods Andrew Binley, William Daily and Abelardo Ramirez	Page 6
Complex Resistivity Tomography for Environmental Applications Abelardo Ramirez, William Daily, Andrew Binley and Douglas LaBrecque	Page 14
2D and 3D Subsurface Resistivity Imaging Using a Constrained Least-Squares Algorithm Manel Gasulla, Josep Jordana and Ramón Pallás-Areny	Page 20
Leakage Detection In Buried Pipes By Electrical Resistance Imaging Josep Jordana, Manel Gasulla and Ramón Pallás-Areny	Page 28
Monitoring Flame Position and Stability in Combustion Cans Using ECT RC Waterfall, R He, P Wolanski and Z Gut	Page 35
Internal Structures in Fluid Beds of Different Scales: An Application of Electrical Capacitance Tomography R B White and A Zakhari	Page 39
Using ERT For Multi-Phase Flow Monitoring W W Loh, R C Waterfall, J Cory and G P Lucas	Page 47
Analysis and Flow Regime Identification of Bubble Column Dynamics M A Bennett, S P Luke, X Jia, R M West and R A Williams	Page 54

Direct Imaging of Two-phase Flows By Electrical Impedance Measurements

Eric Hervieu and Paulo Seleglim Junior

Page 62

Control of Pneumatic Conveying Using ECT

D Neuffer, A Alvarez, D H Owens, K L Ostrowski, S P Luke and R A Williams

Page 71

Measurements of Gas-liquid Mixing in a Stirred Vessel using Electrical Resistance Tomography (ERT)

M Wang, A Dorward, D Vlaev and R Mann

Page 78

Modelling of Multiphase Processes Using Tomographic Data for Optimisation and Control

H. Tabe, S J R Simons, J Savery, R M West and R A Williams

Page 84

ECT Studies of Bead Fluidization in Vertical Mills

David M Scott and Oliver W Gutsche

Page 90

Application of Capacitance Electrical Tomography for On-Line and Off-line Analysis of Flow Patterns in a Horizontal Pipeline of a Pneumatic Conveyor

KL Ostrowski, R A Williams, S P Luke and M A Bennett

Page 96

Session A2: Applications

Industrial Monitoring of Hydrocyclone Operation Using Electrical Resistance Tomography

J Bond, J C Cullivan, N Climpson, I Faulkes, X Jia, J A Kostuch, D Payton, M Wang, S J Wang, R M West and R A Williams

Page 102

Measuring Flowing Foam Density Distributions Using ERT

J J Cilliers, M Wang and S J Neethling

Page 108

Interfacing of EIT into an Industrial Pressure Filter A Practical Example

B D Grieve, T Dyakowski, R Mann and M Wang

Page 113

Detecting Filter-cake Pathologies in Solid-liquid Filtration: Semi-tech Scale Demonstrations using Electrical Resistance Tomography (ERT)

D S Vlaev, M Wang, T Dyakowski, R Mann and B D Grieve

Page 120

Advanced Profile Gauge for Multiphase Systems

R B Schüller, M Halleraker and B Engebretsen

Page 126

Performance and Application Studies of an Electrical Resistance Tomography System

K Primrose and C Qiu

Page 133

Development of Electrical Capacitance Tomography for Solids Mass Flow Measurement and Control of Pneumatic Conveying Systems A Arko, R C Waterfall, M S Beck, T Dyakowski, P Sutcliffe and M Byars	Page 140
A Behaviour of A Catalyst Powder Flowing Down In A Dipleg S J Wang, D Geldart, M S Beck and T Dyakowski	Page 147
Measurement of Bulk Particulates on Belt Conveyor Using Dielectric Tomography R A Williams, S P Luke, K L Ostrowski and M A Bennett	Page 153
Modelling and Mapping Electrical Resistance Changes Due to Hearth Erosion in a 'Cold' Model of a Blast Furnace M Wang, S Johnstone, W J N Pritchard and T A York	Page 161
Dynamic Combustion Tomography Tadeusz Piotrowski, Andrzej Plaskowski, Maurice Beck and Malcolm Byars	Page 167

Session S1: Algorithms

Image Reconstruction of an Electrical Capacitance Tomography System Using an Artificial Neural Network T D Sun, R Mudde, J C Schouten, B Scarlett, C M van den Bleek	Page 174
Algorithms of 3D Cone Beam Tomography For Incomplete Data O Trofimov, S Kasjanova and D Badazhkov	Page 181
An Algorithm Based On Perturbation Theory For Electrical Capacitance Tomography L F C Jeanmeure, W B J Zimmerman, T Dyakowski, AJ Jaworski, and G A Davies,	Page 184
Analytical Solution to the Three Dimensional Electrical Forward Problem for a Circular Cylinder F Kleinermann, N J Avis and F A Alhargan	Page 189
Opportunities for Data Fusion in Multi-Modality Tomography R M West and R A Williams	Page 195
Microwave Imaging of 3D Lossy Dielectric Objects Using Algebraic Reconstruction Techniques AT Nugroho and Z Wu	Page 201
Information Retrieval by Electrical Capacitance Tomography: Evaluation of an Iterative Algorithm and the Importance of Boundary Conditions H McCann, W Q Yang and N P Polydorides	Page 206

Detection of Scattering and Absorption by NIR Tomography Thomas Dierkes	Page 211
Developments of 3-D Reconstruction Algorithms for ERT P A T Pinheiro, W W Loh and R C Waterfall	Page 569
An Improved Normalisation Approach For Electrical Capacitance Tomography W Q Yang, M Byars	Page 215
Development of Electromagnetic Tomography (EMT) for Industrial Applications Part 2: Image Reconstruction and Software Framework A R Borges, J E de Oliveira, J Velez, C Tavares, F Linhares and A J Peyton	Page 219
Session A3: Applications	
Three-Phase Flow Measurement in the Offshore Oil Industry – Is There a Place for Process Tomography? Richard Thorn, Geir Anton Johansen and Erling A Hammer	Page 228
Development of a Variable Density Flowmeter for an Industrial Application R Deloughry, M Young, E Pickup and L Barratt	Page 236
Investigation and Model Validation of Media Motion in a Vertical Stirred Mill Using Positron Emission Particle Tracking J Conway-Baker, R W Barley, R A Williams, A J Clarke, J A Kostuch and D J Parker	Page 244
Testing of the Failure of the Solid Rocket Propellant with Tomography Methods Krzysztof Tomkiewicz, Andrzej Plaskowski, Maurice S Beck and Malcolm Byars	Page 249
Characterization of Semi-crystalline Polymers Using MRI Apostolos Kantzas and David Axelson	Page 256
Application of Gamma Camera Imaging and SPECT Systems in Chemical Processes Apostolos Kantzas, Kelly Hamilton, Taghi Zarabi, Amit Bhargava, Ian Wright, Glen Brook and Jinwen Chen	Page 264
Network Analysis of Filter Cake Pore Structure by High Resolution X-Ray Microtomography C L Lin and J D Miller	Page 272
Tomographic Measurements of Micro- and Macromixing Using the Dual Wavelength Photometry Mathhias Buchmann and Dieter Mewe	Page 281

A Portable Capacitance Probe for Detection of Interface Levels in Multi-Phase Flows - A Case Study

AJ Jaworski, T Dyakowski and G A Davies

Page 289

Tomographic Imaging of the Void Distribution in Bubble Columns During Blowdown

D Schmitz and D Mewes

Page 297

Session H1: Hardware

Development of Electromagnetic Tomography (EMT) for Industrial Applications Part 1: Sensor Design and Instrumentation

A J Peyton, M S Beck, A R Borges, J E de Oliveira, G M Lyon, Z Z Yu, M W Brown and J Ferrerra

Page 306

Electrical Capacitance Tomography with a Square Sensor

W Q Yang and S Liu

Page 313

The Measurement of Dielectric Properties of Liquids at Microwave Frequencies Using Open-ended Coaxial Probes

A. Boughriet, Z Wu, H McCann, and L E Davis

Page 318

Multi-Sensor Process Tomography System Design: Part 1 – Systems and Hardware Engineering

B S Hoyle, F J W Podd, H I Schlaberg, M Wang, R A Williams, and T A York

Page 323

Two-Dimensional Simulation of Electrostatic Field for Electrical Resistance Tomography

K L Ostrowski and R A Williams

Page 328

Experimental Study of the Guard Electrodes in an ERT System

Yixin Ma, Ling-An Xu and Changzhen Jiang

Page 335

Void Fraction and Flow Regime Determination by Low-Energy Multi-Beam Gamma-Ray Densitometry

E Abro and G A Johansen

Page 339

Electrochemical Issues in Impedance Tomography

A. McNaughtan, K Meney and B Grieve

Page 344

Effect of Axial Guard Electrodes on Sensing Field of Capacitance Tomographic Sensor

Hui Xu, Gang Yang and Shi Wang

Page 348

Session H2: Hardware

Investigation of the Two-phase Countercurrent Flow in Structured Packings using Capacitance Tomography

T Loser, G Petritsch and D Mewes

Page 354

Conception of a High Resolution X-Ray Computed Tomography Device; Application To Damage Initiation Imaging Inside Materials

E Cend्रे, P Duvauchelle, G Peix, J-Y Buffière and D Babot

Page 362

Evaluation of Integrated Electrodes for Electrical Capacitance Tomography

Philip Williams and Trevor York

Page 370

A Microcontroller-based High-speed Serial Link For Process Tomography Systems

H K S Lim and W Q Yang

Page 377

Imaging Nylon Polymerisation Processes by Applying Electrical Tomography

T Dyakowski, M Mikos, D Vlaev, R Mann, G W Follows, A Boxman and M P W Wilson

Page 383

Simulation Study of Capacitance Tomography Sensors

Hua Yan, Fuqun Shao, and Shi Wang

Page 388

A Sensing Circuit For Micro-Capacitance Tomography

Iwan Evans, Alan Somerville and Trevor York

Page 395

X-Ray Computer Tomography - Potential and Limitation for the Measurement of Local Solids Distribution in Circulating Fluidised Beds

T Grassler and K-E Wirth

Page 402

Three-dimensional Effects in Electrical Impedance Tomography

M Wang

Page 410

A Fast Active Differentiator Capacitance Transducer for Electrical Capacitance Tomography

W K Hartveld, P A van Halderen, R F Mudde, C M van den Bleek, H E A van den Akker and B. Scarlett

Page 564

Session S2: Algorithms

An Improved Simultaneous Iterative Reconstruction Technique For Electrical Capacitance Tomography

Su Bangliang, Peng Lihui, Yao Danya, Zhang Baofen

Page 418

Efficient Sampling of the Exponential Radon Transform Laurent Desbat and Raphaël Thierry	Page 423
Iterative Image Reconstruction From Projections Based On Generalised Kaiser-Bessel Window Functions Filip Jacobs and Ignace Lemahieu	Page 427
Tomographic Reconstruction Using Ridge Functions Ivan Kazantsev	Page 433
Multipath Flowrate Measurements of Symmetric and Asymmetric Flows M Rychagov, STereshchenko, B Dean and L Lynnworth	Page 438
Parametric Modelling In Industrial Process Tomography R M West, X Jia, and R A Williams	Page 444
Eddy Current Tomography for Metal Solidification Imaging Minh H Pham, Yingbo Hua and Neil B Gray	Page 451
Multi-Sensor Process Tomography System Design: Part 2 - Data Processing and Systems Software Design B S Hoyle, X Jia, H McCann, F J W Podd, H I Schlaberg, R M West and R A Williams	Page 459
Development of Iterative Algorithms for Industrial Tomography A V Likhachov, V V Pickalov, N V Chugunova and V A Baranov	Page 463
Electromagnetic Monitoring of Internal Structure of Three-Dimensional Objects V G Yakhno	Page 470
Electrical Impedance and Diffuse Optical Tomography Reconstruction Software W R B Lionheart, S R Arridge, M Schweiger, M Vauhkonen and J P Kaipio	Page 474
Session E1: Emerging Technologies	
Near Infra-Red Absorption Tomography for Measurement of Chemical Species Distribution S J Carey, H McCann, D E Winterbone and E Clough	Page 480
Optical Tomography for Dielectric Profiling in Processing Electronic Materials L Zeni, R Bernini and R Pierri	Page 488
Optical Tensor Field Tomography for the Determination of 3D Stress in Photoelastic Materials D Schupp	Page 494

Feasibility Study of Planar-Array Electromagnetic Inductance Tomography (EMT) S Ramli and A J Peyton	Page 502
Optical Fibres For Process Tomography: A Design Study S Ibrahim, R G Green, K Dutton, R Abdul Rahim, K Evans and A Goude	Page 511
Fibre Optic Lens Modelling for Optical Tomography N Ramli, R G Green, R Abdul Rahim, K Evans and B Naylor	Page 517
Preliminary Studies of Planar Capacitance Tomography Alan Somerville, Iwan Evans and Trevor York	Page 522
Optical Fluorescence Auto-Projection Tomography: A Novel Modality Francis Hindle and Hugh McCann	Page 530
Waveform Inversion in Acoustic Pyrometry Helmut Sielschott and Frank Wübbeling	Page 538
Simultaneous Compensation for Attenuation, Scatter and Detector Response for 2D-Emission Tomography on Nuclear Waste with Reduced Data Raphaël Thierry, Jean-Luc Pettier and Laurent Desbat	Page 542
Status and Applications of Microelectrical Resistance Tomography H S Tapp and R A Williams	Page 552
Monitoring Particle Flows by Displacement Current Sensing M.Machida, B.Scarlett	Page 560
