

2nd World Congress on Industrial Process Tomography

CONTENTS

Introduction

Wednesday 09:00 - 13:00

Overview I

Process Imaging: What Industry Wants
D Scott

Page 2

Software I: Electrical Capacitance Tomography

Reconstruction Algorithms for Permittivity and Conductivity Imaging
W R B Lionheart

Page 4

Use of Raw Capacitance Tomography Data for Flow Pattern Control
L F C Jeanmeure, T Dyakowski, W B J Zimmerman, G Baker

Page 12

New Reconstruction Algorithm for Electrical Capacitance Tomography
T Loser, R Wajman, D Mewes

Page 20

Comparison of Three Image Reconstruction Algorithms for Electrical Capacitance Tomography
S Liu, L Fu, W Q Yang

Page 29

Using Principal Component Analysis to Measure Two-Phase Flow Concentration
L Zhou, Y C Zhang, D Y Yao, L H Peng, B F Zhang

Page 35

Filtering in Image Reconstruction for Electrical Capacitance Tomography
S M Ge, W Q Yang

Page 41

Visualization of Time-Space Dominant Particle from CT Images Using 3D Wavelets Transform - Comparison Between Non-Choking and Pseudo Choking
M Takei, H Li, M Ochi, Y Saito, K Horii, T Dyakowski

Page 48

Regularization Based Image Reconstruction of Electrical Capacitance Tomography
L H Peng, D Y Yao, B F Zhang

Page 57

Hardware I: Microwave, T-Ray and X-Ray Systems

2.45GHz Microwave Camera for ISM Applications
A Joisel, J Ch Bolomey

Page 68

X-ray Fluorescence Auto Projection Tomography (X-FAPT)
K I Dietzel, G A Johansen, H McCann

Page 74

High-Resolution Microtomograph (Micro-CT)

A Sasov

Page 82

Dual Energy X-Ray Tomography in Process Engineering - A Non-Intrusive Technique to Characterise Vertical Multiphase Flows

T Grassler, K E Wirth

Page 90

A New Cone Beam X-ray Microtomography Facility for 3D Analysis of Multiphase Materials

C L Lin, J D Miller

Page 98

X-Ray Microtomography : a New Tool to Follow Soft Material Shrinkage During Convective Drying

A Léonard, S Blacher, P Marchot, M Crine

Page 110

Radar Imaging of the Natural Environment

S J Lane, R O Mackin, A Binley, H Pinkerton, R Middleton, A Peyton

Page 118

The Clinical Need for a Dental CAT-Scan

G C Bushway

Page 126

Wednesday 14:00 - 17:45

Overview II

Tomography and Velocimetry for Multiphase Reactors: A USA Perspective

M H Al-Dahhan, M P Dudukovic

Page 136

Applications I: Mixing and Flow Measurement

Imaging of Steel Profiles within a Pouring Nozzle

R Binns, A R A Lyons, A J Peyton

Page 138

Measurement of the Angular Velocity Distribution in Miscible Liquid Mixing Using Electrical Resistance Tomography

M Wang, W Yin

Page 146

Dual-Validation of Miscible Liquid Mixing in a Stirred Vessel Imaged by Electrical Resistance Tomography (ERT)

S J Stanley, E Wabo, R Mann, K Primrose

Page 151

Application of Electrical Resistance Tomography (ERT) to Monitor a Flow – Follower in a Stirred Vessel

K. Salem, K. Kling, R Mann

Page 159

Multiphase Flow Regime Identification by Multibeam Gamma-Ray Densitometry

S A Tjugum, G A Johansen

Page 168

The Application of Electrical Resistance Tomography to a Large Volume Production Pressure Filter

B D Grieve, Q Smit, R Mann, T A York

Page 175

Electrical Resistance Tomography (ERT) Imaging of a Metal-Walled Solid-Liquid Filter

E L Yuen, R Mann, T A York, B D Grieve

Page 183

Utilizing Internal Electrodes in Volume Fraction Estimation by Electrical Process Tomography

L M Heikkinen, M Vauhkonen, T Savolainen, J P Kaipio

Page 191

State Estimation in Three Dimensional Impedance Imaging – Use of Fluid Dynamical Evolution Models

A Seppänen, M Vauhkonen, P J Vauhkonen, E Somersalo, J P Kaipio

Page 198

Hardware II: Optical and Electromagnetic Systems

Optical Interferometric and Dual Wavelength Photometric Tomographic Methods

D Mewes, K Kling

Page 208

Assessment of The Basic Metrological Properties of an Optical Tomograph at the Gas-Bubble Measurement

M R Rzasa, B Dobrowolski

Page 220

Chemical Species Tomography of Sprays of Volatile Hydrocarbons by Near Infra-Red Absorption

H McCann, S J Carey, F P Hindle, K B Ozanyan, D E Winterbone, E Clough

Page 228

Magnetic Induction Tomography – New Imaging Method in Biomedicine

A V Korjenevsky, V A Cherepenin, S A Sapetsky

Page 240

Multi-Excitation-Mode Electromagnetic Tomography (EMT) System

M He, Z Liu, L J Xu, L-A Xu

Page 247

A Modified Electromagnetic Flowmeter for In-line Monitoring of Rheological Parameters

A Hans

Page 256

Fast Industrial Computed Tomography and its Applications

S Gondrom, M Maisl, S Schröpfer, T Wenzel, M Purschke

Page 265

Custom Silicon for Finite Element Modelling

M Komarudin, T A York, W R B Lionheart

Page 272

The Flow of Newtonian and Non-Newtonian Fluids in Porous Solid Matrices Described Particularly by Magnetic Resonance Tomography

C Heinen, G Guthausen, H Buggisch

Page 281

Thursday 09:00 - 13:00

Overview III

Recent Commercial Developments in Ultrasound Imaging

G Hetzel

Page 290

Applications II: Porous Materials, Pastes and Powders

Multiple Radioactive Particle Tracking in Fluidized Beds Using Gamma Cameras

A Kantzas, C L Hyndman, K Hamilton, L Schober, I Wright

Page 292

Electrical Impedance Imaging of Paste During Extrusion

R M West, Y Wu, D M Scott, G Sunshine, B S Hoyle, J Kostuch, C N McLeod, R A Williams Page 300

Using Electrical Capacitance Tomography to Monitor Gas Voids in a Packed Bed of Solids

R B White Page 307

A Study of the Mixing Characteristics of a Liquid Magnetically Stabilised Fluidised Bed Using Electrical Resistance Tomography

Y Y Hou, M Wang, R Holt, R A Williams Page 315

Application of Process Tomography as a Tool for Better Understanding of Fluidization Quality in a Conventional Fluidized Bed

Y T Makkawi, P C Wright Page 324

Progress of the ECT Application in Dust-Air Explosibility Research

A Plaskowski, T Piotrowski, M Fraczak, B Zygmunt, B Hancyk Page 339

Structure of Transaxial Flow in a Powder Mixer

B F C Laurent, J Bridgwater and D J Parker Page 346

Tomographic Measurements of Solids Mass Flow in Pneumatic Conveying. What Do We Need to Know About the Flow Physics?

A J Jaworski, T Dyakowski Page 353

Positron Imaging Studies of Rotating Drums

D J Parker, R N G Forster, P Fowles, Y Ding, J P K Seville Page 362

The Flow of Solution and Crystals in a Draft Tube Crystalliser Investigated Using Positron Emission Particle Tracking

G S M van Beuzekom, M D de Jong, Z I Kolar, H J M Kramer, B Scarlett Page 370

Software II: Electrical Impedance Tomography

Using Process Tomography as a Sensor in a System for Controlling Concentration in Fluid Flow

S Duncan Page 378

Considerations in Electrical Impedance Imaging

N Polydorides, W R B Lionheart, H McCann Page 387

Sensitivity Theorem Based Inverse Solution Using Conjugate Gradients Methods for Electrical Impedance Tomography

M Wang Page 395

Finite Element Optimizations for Efficient Non-Linear Electrical Tomography Reconstruction

M Molinari, H Fangohr, J Generowicz, S J Cox Page 406

Imaging Rangeability of Particular ERT Reconstruction Algorithms

Y Ma, M Wang, Z Zheng, Y Wu, N Holliday Page 418

Efficient Non-Linear 3D Electrical Tomography Reconstruction

M Molinari, S J Cox, B H Blott, G J Daniell Page 424

Total Variation Regularisation in EIT Reconstruction

A Borsic, C N McLeod, W R B Lionheart Page 433

Thursday 14:00 - 17:45

Overview IV

Software for Improved Imaging

J P Kaipio

Page 442

Software III: Higher Energy Modalities

Automatic Evaluation of 3D-CT Data Without CAD Information

S Oeckl, U Hassler, T Wenzel, R Hanke

Page 444

X-Ray Microtomography Facilitated Modelling of Microstructures

X Jia, N Gopinathan, R A Williams, C N Eberhardt, A R Clarke

Page 451

Three Dimensional Reconstruction of ^{99m}Tc Distribution by Using Coded Aperture ECT

T Ito, H Otake, T Inoue, K Endo

Page 461

Synchrotron Radiation-Based Microtomography: Capabilities and Applications

E Boller, P Cloetens, W Ludwig, S Nuzzo, J Baruchel

Page 469

Microwave Tomographic Imaging of Dielectric Objects Using Newton-Kantorovich Algorithms

Z Wu, H McCann, L E Davis, A Boughriet, A T Nugroho

Page 477

Hardware 3: Electrical Resistance / Impedance Systems

A High Adaptive Electrical Impedance Sensing System For Flow Measurement

M Wang, W Yin

Page 486

Current Pulse Technique for Electrical Resistance Tomography Measurements

E W Randall, A J Wilkinson, J J Cilliers, W Xie, S J Neethling

Page 493

A High Speed, Multi-Frequency Impedance Analysing Node

S J Dickinson, A J Peyton

Page 502

Problems of the Data Acquisition Rate for Impedance Tomography

Z Szczepanik, Z Rucki

Page 511

Phase Measurement in Biomedical Magnetic Induction Tomography

S Watson, R J Williams, W Gough, A Morris, H Griffiths

Page 517

Gas-Water Flow Interface Characterisation Using Electrical Resistance Tomography

M Wang, Z Zhen, Y Ma, D Li, L Lao, R A Williams, Y Wu, B Hoyle

Page 525

Identification of Two-Phase Flow Regime Using Electrical Resistance Tomography

F Dong, X P Liu, X Deng, L J Xu, L-A Xu

Page 531

Friday 09:00 - 13:00

Overview V

Selecting the Technology for the Application

E A Hammer

Page 540

Hardware IV: Electrical Capacitance Systems

Developments in Electrical Capacitance Tomography

M Byars

Page 542

Towards the Development of a Multiple-Frequency ECT System

D Georgakopoulos, R C Waterfall, W Q Yang

Page 550

Advance in AC-based Capacitance Tomography System

W Q Yang

Page 557

Cost Effective Loading of Road Tankers Using Process Tomography

R Deloughry, M Young, E Pickup, L Barratt

Page 565

Impedance Analyser Based Tomography System

A Chondronasios, W Q Yang, V T Nguyen

Page 573

A Novel Capacitance Measurement Circuit for Electrical Capacitance Tomography

B L Wang, Z Y Huang, H Q Li

Page 580

Key Issues in the Design of a Capacitance Transducer for Tomography

D Georgakopoulos and W Q Yang

Page 586

Analysis of Non-Ideal Characteristics of an AC-Based Capacitance Transducer for Tomography

J C Gamio, W Q Yang, A L Stott

Page 595

Applicability of Electrical Capacitance Tomography to the Study of Gasoline Direct Injection Sprays and Combustion

W C Sanders, S L Ceccio, V Sick

Page 603

Applications III: Gas-Liquid Flows

The Combined Use of Flow Visualisation, Electrical Resistance Tomography and Computational Fluid Dynamics Modelling to Study Mixing in a Pipe

R B White, K Simic, P R Strobe

Page 610

Application of Electrical Capacitance Measurements to Study the Collapse of Oil Foams

D Pacho, G Davies

Page 618

Modelling Flow of Water and Air in Reconstructed Structures of Porous Media

P Lehmann, M Krafczyk, A Gygi, A Flisch, P Wyss, H Flühler

Page 628

Determination of Flow Patterns and Void Fraction of Multiphase Flows Using Electrical Capacitance Tomography

A E Corlett

Page 636

Water Concentrations and Interface Positions by Single Electrode Capacitance Probes (SeCaP™)

R B Schüller, T Solbakken, B Engebretsen, M Halleraker

Page 644

Demonstration of a Novel Retrofit Tomography Baffle Cage for Gas-liquid Mixing Studies Under Intense Operating Conditions

M Cooke, G Bolton, D H Jones, D Housley

Page 652

Singularity Image Method for Electrical Impedance Tomography of Bubbly Flows

C Huang, J Lee, W W Schultz, S L Ceccio

Page 661

Measurement of the Gas Phase Velocity in Gas-Liquid Flows Using a Dual-Plane ERT System

X Deng, F Dong, L J Xu, X P Liu, L A Xu

Page 669

Analysis of Electrical Resistance Tomography Measurements Obtained in a Bubble Column: Dynamic Aspects, First Results

E Fransolet, M Crine, G L'Homme, D Toye, P Marchot

Page 677

Friday 14:00 - 16:00

Applications IV: Control Inspection and Safety

NMR for Process Control: Imaging and Localized NMR in Soft Matter

B Blümich

Page 688

A Case Study Demonstrating Automatic Interpretation and Optimization of Regularization for Electrical Resistance Tomography

R M West, H S Tapp, D M Spink, M A Bennett, R A Williams

Page 696

Digital MicroLaminography for High-Resolution Inspection of Electronic Assemblies

A Sasov

Page 705

Influence of Unsharpness on Crack Length Evaluation with Computerized Tomography Methods

A V Likhachov, V V Pickalov, U Ewert, B Redmer

Page 711

Process Tomography for Contamination Detection in Liquid Foods: A Feasibility Study

G T Bolton, U Sharif

Page 719

Flow Regime Identification and Optimum Interfacial Area Control of Bubble Columns Using Electrical Impedance Imaging

M Wang, X Jia, M Bennett, R A Williams

Page 726

Software IV: Other Modalities

Image Segmentation Algorithms for Industrial Process Tomography

D Sankowski, A Plaskowski, V Mosorov, K Strzecha, S Jezewski

Page 736

Scattered Radiation Problem in Three-Dimensional Transmission Tomography

A V Likhachov, V V Pickalov

Page 742

Direct Flow Process Estimations From Tomographic Data Using Artificial Neural Systems

J Mohamad-Saleh, B S Hoyle, F J W Podd, D M Spink

Page 751

Optimisation of a γ -Tomograph for Imaging Dense Phase Flow

M Campbell, J Sun, J M Crowther, A S Eadie, E A Knight, P Marjanovic, P A Wallace

Page 759

Appendix I: Late Papers

Statistical Estimation Theory Approach for the Dynamic Image Reconstruction

G-R Tillack, V M Artemiev, A O Naumov

Page 772

A Regularized Multivariate Linear Regression Image Reconstruction Algorithm for ERT

Y Wei, J Zhao, S Wang

Page 780

Analytical Solution to the Three Dimensional Electrical Forward Problem for an Elliptical Cylinder

F Kleinermann, N J Avis and F A Alhargan

Page 787

Mathematical and Experimental Investigation of the Quasi-Static Conditions for Multi-Frequency Electrical Impedance Tomography

F Kleinermann, N J Avis, F A Alhargan

Page 795
