

CONTENTS

Tuesday 2nd September, 14:00 - 18:00

Overview I

Process Tomography and Particle Tracking: Research and Commercial Diagnostic Tool E H Stitt, K James	Page 2
--	--------

Hardware I: Electrical Impedance Tomography

Best Value Design of Electrical Tomography Systems D Georgakopoulos, W Q Yang, R C Waterfall	Page 11
Prototype Hardware for Finite Element Modelling M Komarudin, W R B Lionheart, T A York	Page 20
A High Performance Online Data Processing EIT System Y Ma, N Holliday, Y Dai, M Wang, R A Williams, G Lucas	Page 27
Towards Miniaturised Electrical Tomography Systems T N Phua, L Sun, C Gregory, J Hatfield, T A York	Page 33
Depth Profile Scanning of Cylindrical Bar and Wire Using a Spectroscopic Direct Current Injection Technique S J Dickinson, R Binns, A J Peyton, W Yin	Page 39
A Specific Signal Conditioner for Electrical Impedance Tomography Y Dai, Y Ma, M Wang	Page 45
A Modular, Adaptive Electrical Impedance Tomography System T Savolainen, L M Heikkinen, M Vauhkonen, J P Kaipio	Page 50
An Electrical-Impedance Tomography System for Collecting Validation-Quality Data from Gas-Solid Flows P R Tortora, S L Ceccio, W W Schultz, T J O'Hern, J R Torczynski, S M Trujillo	Page 56
A Powerful Computational DSP Module for Multiphase Flow Measurement N Holliday, Y Ma, M Wang	Page 62

Software I: Hard-Field Techniques

Perspective in Data Fusion Between X-ray Computed Tomography and Electrical Capacitance Tomography in an Absorption Column D Toye, G L'Homme, M Crine, P Marchot	Page 68
Advances in Automatic Evaluation of 3D-CT Data S Oeckl, U Hassler, T Wenzel, M Maisl, R Hanke	Page 74
Image Reconstruction Algorithms for High-Speed Chemical Species Tomography C A Garcia-Stewart, N Polydorides, K B Ozanyan, H McCann	Page 80
Automatic Weight Matrix Generation for Gamma-ray Tomography R Maad, G A Johansen	Page 86
Quality Improvements for Cone-Beam CT Using Beam Hardening and Scattering Correction S Kasperl, M Franz, R Hanke, U Hassler, S Schröpfer	Page 90

High-Energy Gamma-ray Tomography in the Nuclear Industry

B A Cattle, L Elliott, A S Fellerman, D B Ingham, D Lesnic, R M West Page 96

Characterisation of the Correction Map for an OFAPT Sensor with Fibre Receivers

K B Ozanyan, H McCann Page 102

A Source Model for Optical Diffusion Tomography

T Vilhunen, V Kolehmainen, M Vauhkonen, J P Kaipio Page 110

Industrial Inspection and Measurement Processes Using Micro Computer Tomography

N Blessing Page 115

Applications I: Model Validation with Tomographic Data

Phase Distribution in a High Pressure Slurry Bubble Column Via Computed Tomography

A Shaikh, N Rados, M Al-Dahhan Page 121

An Experimental and Simulation Study of the Hydrodynamics of a Linear Low Density Polyethylene

L Schober, I Hulme, B Chandrasekaran, A Kantzas Page 128

Potential of Combined Macro- and Micro-Scale Tomography to Monitor Multiphase Viscous Fluid Mixing

L Ruffino, T A York, R Mann, G Tiddy, O Tadthong, P Bonnet, B D Grieve Page 134

Visualisation of Air Bubbles by Magnetic Resonance Imaging

F Heese, P Robson, L Hall Page 140

Tomographic Analysis of Floccs and Flocculating Suspensions

C Selomulya, X Jia, R A Williams Page 145

Quantitation of Heating of Foods Using Magnetic Resonance Imaging

K Nott, L Hall Page 152

Monitoring of Air Bubbles in Pulp Flow based on Electrical Impedance Tomography

S Zhou, J Halttunen Page 157

Flow Distribution in Countercurrent Flow Structured Packing Bed via Computed Tomography

S Roy, M H Al-Dahhan, M P Dudukovic, T B Skourlis, F M Dautzenberg Page 163

Wednesday 3rd September, 09:00 - 13:00

Overview II

Monte Carlo Simulation for Radiation Tomography

R P Gardner Page 169

Hardware II: Hard-Field

Semiconductor Quantum Devices for Optical Tomography

K B Ozanyan Page 171

Scattered Gamma Radiation Utilised for Level Measurements in Gravitational Separators

M B Holstad, G A Johansen, P Jackson, K S Eidsnes Page 181

Multiphase Flow Regime Identification by Multibeam Gamma-ray Densitometry – Experimental Results

S A Tjugum, G A Johansen, O A Iversen Page 187

Element Specific X-ray Tomography at the 15 MeV Electron Linac

B Masschaele, M Dierick, L Vanhoorebeke Page 193

Near Infra-red Tomography for Concentration Measurements of Exhausting Water Vapour of a Packed Bed Adsorber

K Salem, D Mewes, E Tsotsas Page 199

Development and Implementation of Gamma-ray Tomography for Field Applications

M W Darwood, M Davies, D Godden, P Jackson, K James, E H Stitt Page 207

Quasi-3D Modelling of Electromagnetic Wave Scattering of Dielectric Objects for Microwave Tomography

J Hu, Z Wu, H McCann, L E Davis Page 213

Optimisation of the Signal to Noise Performance of Photodiode Receivers in Near-infrared Absorption

P Wright, K B Ozanyan, S J Carey, H McCann Page 219

Software II: Electrical and Magnetic Imaging

Spatial-temporal Modelling for Electrical Impedance Imaging of a Mixing Process

R M West, S Meng, R G Aykroyd, R A Williams Page 226

Non Iterative Inversion Method for Electrical Resistance, Capacitance and Inductance Tomography for Two Phase Materials

A Tamburrino, G Rubinacci, M Soleimani, W R B Lionheart Page 233

Sensitivity Analysis of 3D Magnetic Induction Tomography (MIT)

W R B Lionheart, M Soleimani, A J Peyton Page 239

Optimal Control in Process Tomography

A R Ruuskanen, A Seppänen, S Duncan, E Somersalo, J P Kaipio Page 245

Image Reconstruction in 3D Magnetic Induction Tomography using a FEM Forward Model

M Soleimani, W R B Lionheart, A J Peyton, X Ma Page 252

MERIT - A New Magneto-electrical Resistivity Imaging Technique: Part 1, Modeling and Tomographic Reconstruction

A Kemna, A Tillmann, A Verweerd, E Zimmermann, H Vereecken Page 256

MERIT - A New Magneto-electrical Resistivity Imaging Technique: Part 2, Magnetic Sensors and Instrumentation

E Zimmermann, A Verweerd, W Glaas, A Tillmann, A Kemna Page 262

A Quantitative Algorithm for Parameter Estimation in Magnetic Induction Tomography

R Casanova Luis, A F da Silva, A R Borges Page 268

Forward Problem in 3D Magnetic Induction Tomography (MIT)

M Soleimani, W R B Lionheart, C H Riedel, O Dössel Page 275

Applications II: Flow Measurements

A Novel Tomographic Flow Analysis System

A Hunt, J D Pendleton, R B White Page 281

Volumetric Flow Rates from Impedance Tomography in Oil/Gas Flows G Fehmers	Page 287
Development of a Signal Prediction Based ECT-System for Precise Flow Velocity Measurement A Fuchs, B Brandstätter	Page 293
Application of Electrical Resistance Tomography to Two-Phase Flow and Void Fraction Measurement F Dong, X T Qiao, Z X Jiang, L A Xu	Page 299
The Use of Electrical Resistance Tomography (ERT) to Monitor Flow Patterns in Horizontal Slurry Transport Pipelines A D Pachowko, M Wang, C Poole, D Rhodes	Page 305
Non-invasive Imaging of Pressure-driven Suspension Flows with Electrical Resistance Tomography J T Norman, H V Nayak, R T Bonneau	Page 312
Acoustical Tomographic Imaging of Flow Fields P Holstein, R Müller, A Raabe, M Barth, D Mackenzie, K Arnold, A Ziemann, M Schatz	Page 318
Application of Optical Tomography for Measurement of Small Gas Flows M R Rzaşa, A Płaskowski	Page 324
3D Presentation of Images with Capacitance Tomography H G Wang, S Liu, F Jiang, W Q Yang	Page 331

Wednesday 3rd September, 14:00 - 18:00

Overview III

Computed Tomography Applications for the Oil and Gas Industry L Tomutsa	Page 337
---	----------

Hardware III: Electromagnetic Inductance

A State of the Art Review of Electromagnetic Tomography H S Tapp, A J Peyton	Page 340
Numerical Simulation of Eddy Current Losses in High Frequency Magnetic Field Water Fraction Meters E A Hammer, F Pettersen, A Nødseth	Page 347
Characterising the Effects of the External Electromagnetic Shield on a Magnetic Induction Tomography Sensor A J Peyton, S Watson, R J Williams, H Griffiths, W Gough	Page 352
A 3D Imaging System for Measuring the Shape and Volume of the Human Body W A Wan-Daud, H S Tapp, C Ktistis, A J Peyton	Page 358
Understanding the Coupling Mechanisms in High Frequency EMT D Goss, R O Mackin, E Crescenzo, H S Tapp, A J Peyton	Page 364
Optimizing the Spatial Sensitivity Response of a New Current Sensor Constructed with a Printed Coil Array A Salisbury, A J Peyton, A Dytch	Page 370

Development of Electromagnetic Inductance Tomography (EMT) Hardware for Determining Human Body Composition

D Goss, R O Mackin, E Crescenzo, H S Tapp, A J Peyton

Page 377

A Combined Digital Camera - EMT System to Measure Human Body Composition

H S Tapp, D Goss, R O Mackin, E Crescenzo, W A Wan-Daud, C Ktistis, A J Peyton

Page 384

Software III: Electrical Capacitance I

Development of 3-Dimensional Electrical Capacitance Tomography Based on Neural Network Multi-criterion Optimization Image Reconstruction

W Warsito, L-S Fan

Page 391

A Comparison of the Mutual Energy Concept with an Adjoint State Approach for Jacobian Calculation in ECT

B Brandstätter, B Kortschak

Page 397

On-line Iterative Image Reconstruction for ECT

S Liu, L Fu, W Q Yang, H G Wang, F Jiang

Page 403

Image Reconstruction in Process Tomography Using Hierarchical Self-organising Maps

D Benchebra, P V S Ponnappalli, R Deloughry

Page 409

A Fast Gauss-Newton Based ECT Algorithm with Automatic Adjustment of the Regularization Parameter

G Holler, D Watzenig, B Brandstätter

Page 415

A Hybrid Iterative Algorithm for Electrical Capacitance Tomography

T Dyakowski, M Rutkowski, D Sakson

Page 421

An Interpretation of the Linear Back-Projection Algorithm Used in Capacitance Tomography

J C Gamio, C Ortiz-Aleman

Page 427

Applications III: Tomography for Design of Heat and Mass Transfer Equipment

Measurement of Acid-Base Neutralisation Reactions by Magnetic Resonance Imaging

S Evans, L Hall

Page 433

Gamma Tomography System For Determination of Solids Loading in Gas-Solid Flows: Comparison with Axial Pressure Gradient Method

T J O'Hern, S M Trujillo, P R Tortora

Page 438

Measurement of Liquid and Gas Flow Distribution in a Fixed Bed Reactor Using a Gamma-ray Tomographic System

A Koudil, C Boyer, Y Bentolila

Page 445

Study of Stirred Tank Reactor Hydrodynamics Using Positron Emission Particle Tracking

R P Fishwick, E H Stitt, J M Winterbottom

Page 451

Measurement of Particle Separation by Magnetic Resonance Imaging

F Heese, L Hall

Page 457

Using X-ray Microtomography to Improve the Characterisation of Catalyst Pore Structure

L Ruffino, R Mann, R Oldman, E H Stitt, E Boller, P Cloetens, M DiMichiel, J Merino

Page 462

Quantitation of Fluid Flow Through Medical Devices Using Magnetic Resonance Imaging

F Heese, L Hall

Page 468

The Use of Inductance Spectroscopy to Image the Conductivity Distribution of a Layered Conductor

W Yin, S J Dickinson, A J Peyton

Page 472

Study of Solids Distribution and Permeability of Extruded Samples Using X-ray Micro-Tomography

N Gopinathan, X Jia, R A Williams, E H Stitt

Page 479

Thursday 4th September, 09:00 - 13:00

Overview IV

Applications of Electric Potential (Displacement Current) Sensors in Human Body Electrophysiology

C J Harland, T D Clark, R J Prance

Page 485

Hardware IV: Electrical Modalities

Towards Wireless Impedance Tomography Systems

T A York, D Belabdi, A Burnett-Thompson, D Emiroglu, O Egbetola, L McCulloch, S Savvides, W Q Yang

Page 491

Electromagnetic Geotomography – Frequency Selection

A Pralat, R Zdunek

Page 498

The Design of a 1000 Frames/Second ERT Data Capture System and Calibration Techniques Employed

A J Wilkinson, E W Randall, D Durrett, T Naidoo, J J Cilliers

Page 504

Tomometric Approach Using Multi Sensor Data Fusion in Particle Segregation Studies

U Datta, V Mathiesen, S Mylvaganam

Page 510

A Study on the Characterization of Air-water Two-phase Vertical Flow by Using Electrical Resistance Imaging

Y Wu, H Li, M Wang, R A Williams

Page 516

2½D Temperature Mapping: The Tomographic “Blanket”

S Garcia C, K B Ozanyan

Page 522

Software IV: General Imaging

Image Reconstruction for Process Tomography Using Sampled Pattern Matching Method

M Takei, H Li, M Ochi, Y Saito, K Horii

Page 528

Virtual Channel Concept for Measuring Solids Mass Flow Rate

T Dyakowski, V Mosorov, D Sankowski, M Seaton, Ł Mazurkiewicz, K Grudzień, A Jaworski

Page 535

An Experimental Evaluation of the State Estimation with Fluid Dynamical Models in Process Tomography

A Seppänen, L Heikkinen, T Savolainen, E Somersalo, J P Kaipio

Page 541

Research on the Pixel-pixel Cross Correlation for the Velocity Distribution Measurement of Two-phase Flow

X Deng, L H Peng, D Y Yao, B F Zhang

Page 547

Multigrid Implementation of Some Regularized Image Reconstruction Methods for Limited-Data Tomography

R Zdunek, A Pralat

Page 553

Image Reconstruction for Pressure Filtration Using EIDORS 3D

T A York, Ł Mazurkiewicz, N Polydorides, R Mann, B Grieve

Page 559

Generic Reality Visualisation Models Through Fusion of Process Tomography Sensor Data

B S Hoyle, X Jia, X Z Wang, R A Williams

Page 565

Octopus, a Fast and User-friendly Tomography Reconstruction Package Developed in LabView

M Dierick, B Masschaele, L Van Hoorebeke

Page 571

Applications IV: Tomography for Particulate Processes

Positron Emission Tomography Applied to Fluidization Engineering

C Dechsiri, F Van de Wiel, H G Dehling, A M J Paans, A C Hoffmann

Page 577

Observation of 3-D Structure of Bubbles in a Fluidized Catalyst Bed

T Kai, M Misawa, T Kanda, T Takahashi, I Tiseanu, N Ichikawa

Page 583

Fast Computed Tomographic Imaging within Turbulent Fluidised Beds

P R P Bruneau, R F Mudde, T H J J van der Hagen

Page 589

Tracking Individual Particles in a Fluidized Bed Using a Medical PET-Camera

A C Hoffmann, C Dechsiri, F van de Wiel, A Ghione, H G Dehling, A M J Paans

Page 595

Computational Modelling of Packed Bed Systems

N Gopinathan, M Fairweather, X Jia, R A Williams

Page 601

Use of ERT in a Geotechnical Centrifuge

F K Günzel, C J Fyfe, M C R Davies

Page 607

In Situ Electrical Impedance Imaging of Paste During Extrusion Revealing Structure of Extrudate

R M West, D M Scott, G Sunshine, J Kostuch, L Heikkinen, R Hou, R A Williams

Page 613

Thursday 4th September, 14:00 - 18:00

Overview V

Electrical Impedance Imaging

D Issacson, J Newell, G Saulnier

Page 619

Hardware V: Electrical Capacitance Tomography

Transient Analysis of the AC-based Capacitance Measuring Circuit for Tomography

A Gonzalez-Nakazawa, J C Gamio, W Q Yang

Page 624

A New High-Speed Control Interface for an Electrical Capacitance Tomography System M Byars, J D Pendleton, D Goodeve	Page 631
A Parallel Measurement Strategy for Electrical Capacitance Tomography G Lu, L H Peng, B F Zhang	Page 637
Capacitance Tomography for Dynamic Process Imaging P Brzeski, J Mirkowski, T Olszewski, A Płaskowski, W Smolik, R Szabatin	Page 642
Parallel Realisation of the Linear Back-projection Algorithm for Capacitance Tomography Using TMS320C6701 Digital Signal Processors D F Garcia-Nocetti, J C Gamio, L A Aguilar	Page 648

Software V: Electrical Imaging

Time-varying Electrical Impedance Tomography with IMM Scheme K Y Kim, S I Kang, B S Kim, M C Kim, S Kim	Page 654
The Mathematical Formulation of the State Evolution Equation in Electrical Process Tomography H K Pikkarainen	Page 660
The Combination of Principal Component Analysis with Neural Network as a Highly Efficient 3D EIT Solution M Stasiak, K Siwek, R Sikora, S F Filipowicz, J Sikora	Page 664
Estimating Shapes and Free Surfaces with Electrical Impedance Tomography O-P Tossavainen, M Vauhkonen	Page 671
Enhancement of Electrical Impedance Tomography Images for the Binary Mixture System M C Kim, S Kim, K Y Kim	Page 677
Statistical Inversion Approach for Optimizing Current Patterns in EIT J P Kaipio, A Seppänen, E Somersalo, H Haario	Page 683
Adjoint Formulations in Impedance Imaging N Polydorides, W R B Lionheart	Page 689
Simultaneous Reconstruction of the Boundary Shape and Conductivity in 2D Electrical Impedance Tomography M Soleimani, R Sadleir, K Jersey-Willuhn	Page 695

Applications V: Process Control and Imaging

Application of Electrical Resistance Tomography Technology to Pharmaceutical Processes F Ricard, C Brechtelsbauer, C Lawrence, Y Xu, A Pannier	Page 701
Characterization and Analysis of Copper Heap Leaching by X-ray Computed Tomographic Techniques J D Miller, C L Lin, C Roldan, C Garcia	Page 707
Quantitation of the function of a Biofilm Reactor by Magnetic Resonance Imaging K Nott, F Heese, M Paterson-Beedle, L Macaskie, L Hall	Page 713
Characterization of Liquid-feed Injection Phenomena In Process Engineering By Using Dual-energy X-ray Tomography M Strabel, K E Wirth	Page 718

Identification of Cracks in Copper Mines by Bell Functions Approximation in Electrical Impedance Tomography

R Sikora, J Sikora, S F Filipowicz, Z Giza, M Stasiak

Page 724

Moisture Profiles Determination During Convective Drying Using X-ray Microtomography

A Léonard, S Blacher, P Marchot, J-P Pirard, M Crine

Page 730

Imaging the Flow Profile of Molten Steel Through a Submerged Pouring Nozzle

X Ma, A J Peyton, R Binns, S R Higson

Page 736

Friday 5th September, 09:00 - 13:00

Hardware VI: Development of Sensor Systems

Scattering Effects as Imaging Signals for (Neutron) Tomography

W Treimer, M Strobl, A Hilger, U Feye-Treimer

Page 743

Monitoring of High Pressure Separation of Real Hydrocarbon/Water Mixtures by Single Electrode Capacitance Probes

R B Schüller, K Olsen, M Halleraker, B Engebretsen

Page 750

Development of a Virtual Instrument System for Industrial Process Tomography

R Deloughry, I Davenport, X Ma, P V S Ponnappalli

Page 756

Characterisation of Heterogeneous Mixtures by Using Thick-film Ultrasonic Transducers

T Dyakowski, J Hale, A Jaworski, N White, N Harris, A Nowakowski, G Meng, S Rwifa

Page 761

Process Tomography System by Electrostatic Charge of Particles

M Machida, B Scarlett

Page 767

Software VI: Electrical Capacitance II

Near-Infrared (NIR) Tomography for Breast Cancer Imaging

B W Pogue, K D Paulsen

Page 773

Using Functional Analysis for Understanding Complex 3D Processes

D Sankowski, V Mosorov, K Grudzień, A Płaskowski, A Jaworski

Page 782

Electrical Impedance Tomography in the Half Space: Locating Obstacles by Electrostatic Measurements on the Boundary

B Schappel

Page 788

Application of Simulated Annealing and Genetic Algorithms to the Reconstruction of Electrical Permittivity Images in Capacitance Tomography

C Ortiz-Alemán, R Martin, J C Gamio, A Nicolas

Page 794

Spline Smoothing Algorithms for Improving Capacitance Tomography Image Reconstruction

A Grebennikov

Page 800

Applications VI: Electrical Tomography for Imaging Industrial Processes

Process Compliant Electrical Impedance Instrumentation for Wide Scale Exploitation on Industrial Vessels

B D Grieve, J L Davidson, R Mann, W R B Lionheart, T A York Page 806

Flow Distribution and Velocity Measurement in a Radial Flow Fixed Bed Reactor Using Electrical Resistance Tomography

G T Bolton, C W Hooper, R Mann, E H Stitt Page 813

Flow Uniformity in a Model Digester Measured with Electrical Resistance Tomography

D S Vlaev, C P J Bennington Page 821

Development of an Eddy Current System for Monitoring Taphole Operations

J A Coveney, A J Peyton, A K Kylo, M H Pham, N B Gray Page 828

On Reconciling Tomographic Measurements with a Fluid Mixing Model for Semi-Batch Operation of a Stirred Vessel

S J Stanley, H V Hristov, R Mann, K Primrose Page 834

Using Electrical Capacitance Tomography to Investigate Gas Solid Contacting

R B White Page 840

Late Papers

High-Speed Capacitance Scanner

J Frounchi, F Dehkhoda Page 846

High-Speed Capacitance Measuring System For Process Tomography

J Frounchi, A-R Bazzazi, K Ebnabbasi, K Hosseini Page 853

High Resolution Rotary Electrical Capacitance Tomography System

J Frounchi, A-R Bazzazi Page 858

A Novel Image Reconstruction Algorithm for Electrical Capacitance Tomography Based on Variational Methods and Green's Functions

A Fraguera, J Oliveros, S Gomez Page 864

Density Profiling in Multiphase Systems Using Gamma Ray Absorption

M Darwood, K James, P Jackson, P Hewitt Page 870
